DECEMBER 1953

## FOREWORD

This report is the sixth of a series beginning in 1947. Compiled herein is data with respect to programs administered by the Agricultural Stabilization and Conservation (formerly Production and Marketing Administration) Committees in Virginia. In line with the policy to make the information as usable as possible the general format of the report follows that established in earlier publications.

We very greatly appreciate the efforts of county office personnel, committeemen, and others who made these tabulations possible. It is hoped that the Annual Report will be of assistance to all who are concerned with carrying out the provisions of the various programs.

Virginia ASC State Committee

P. A. Lewis, Chairman  
Roy B. Davis, Jr.  
Everett D. Duncan  
W. H. Daughtrey

## TABLE OF CONTENTS

	Page
<b>SECTION I - THE AGRICULTURAL CONSERVATION PROGRAM - 1952</b>	1
A. STATE SUMMARY OF ACREAGE DATA - 1952 ACP	2
B. STATE SUMMARY OF PAYMENT DATA - 1952 ACP	4
C. 1952 ACP SIZE OF PAYMENT	6
D. PER CENT OF TOTAL PRACTICES CARRIED OUT - 1952 ACP	9
E. SUMMARY OF PERFORMANCE - 1952 ACP	12
1. Standard Ground Limestone Equivalent	12
2. Superphosphate - 20% Equivalent	14
3. Potash - 50% Muriate Equivalent	17
4. Green Manure or Cover Crops - Summary	19
a. Crimson Clover, Vetch, Winter Peas	21
b. Ryegrass	22
c. Small Grain	23
d. Summer Legumes	25
e. Summer non-legumes	25
f. Annual Lespedeza	25
5. Seeding Pastures	25
6. Contour Stripcropping	28
7. Planting Orchards and Vineyards on the Contour	29
8. Terraces - Standard	29
9. Establishing Sod Waterways	30
10. Open Farm Drainage Ditches	30
11. Enclosed Farm Drains	31
12. Farm Ponds	32
13. Tree Planting	33
14. Improving a Stand of Forest Trees	34
15. Special Practice (weed control - chemical)	34
 <b>SECTION II - MARKETING QUOTA PROGRAMS</b>	 35
A. BURLEY TOBACCO ALLOTMENT AND PRODUCTION DATA	38
B. FIRE-CURED TOBACCO ALLOTMENT AND PRODUCTION DATA	39
C. FLUE-CURED TOBACCO ALLOTMENT AND PRODUCTION DATA	40
D. SUN-CURED TOBACCO ALLOTMENT AND PRODUCTION DATA	41
E. 1952 PEANUT ALLOTMENT AND PRODUCTION DATA	42

	Page
SECTION III - PRICE SUPPORT PROGRAMS	43
A. COMMODITY LOAN PROGRAM - 1952	43
SUMMARIES BY COUNTIES OF 1952 COMMODITY LOAN PROGRAM	
a. Wheat	44
(1) Warehouse Storage	44
(2) Farm Storage	45
(3) Purchase Agreements	46
b. Corn	46
(1) Farm Storage	46
(2) Purchase Agreements	47
c. Soybeans	47
(1) Farm Storage	47
d. Kentucky 31 or Fescue	47
(1) Purchase Agreements	47
e. Peanuts	48
(1) Farm Storage	48
(2) Purchase Agreements	48
(3) Growers' Cooperative "Advance Loans"	49

## SECTION I - THE AGRICULTURAL CONSERVATION PROGRAM - 1952

The "ACP" offers incentive to farmers to carry out conservation measures on the farm with the view of preserving the soil and water resources needed to produce the food and fiber for our ever-growing population. By means of cash payments or the furnishing of conservation materials such as ground limestone, fertilizer or seed the farmer is given assistance in carrying out conservation practices. The amount of assistance varies according to the practices performed, but usually is about 50 per cent of the cost of carrying out the practice.

Performance under the 1952 Program was very similar in extent to that under the 1951 ACP. The use of limestone and phosphate materials declined somewhat while potash usage increased. Establishment of pastures was a major item for most counties with other practices showing little change. Over-all, in terms of "credit value" there was some decline in total practices carried out over 1951. This is occasioned no doubt by the smaller allocation of funds for ACP purposes as well as other more intangible factors.

## A. STATE SUMMARY OF ACREAGE DATA - 1952 ACP

County	No. of Farms		Farmland Acreage		Cropland Acreage		Noncrop Pasture Acreage

## SECTION II - MARKETING QUOTA PROGRAMS

The purpose of marketing quotas as stated by the Congress, is to enable farmers, who cannot do so individually, to work together to maintain supplies in line with demand and thereby protect prices at fair levels. When the supply exceeds defined levels--that is, when there is a surplus--or, if a quota was announced for the immediately preceding year, the Secretary of Agriculture is required to announce a quota and to hold a referendum. Growers decide by their vote in the referendum whether quotas will be used. Quotas cannot be used unless they are approved by two-thirds or more of the growers voting in the referendum.

By keeping the amount produced fairly equal to the expected amount to be consumed, growers receive and consumers pay a fair price. Under such balanced conditions there is orderly marketing, no wasted production, and still better, no wasted soil fertility and labor that goes into surplus production.

Marketing Quota Programs in Virginia during 1952 operated on peanuts and the four major kinds of tobacco grown here.

The authority for marketing quotas is contained in the Agricultural Adjustment Act of 1938, and amendments thereto. This Act empowers the Secretary of Agriculture to declare a national marketing quota on certain basic commodities when total supply at the beginning of the marketing season (carry-over stocks plus expected production) exceeds what the law defines as the proper reserve level. However, marketing quotas do not become operative until approved by growers in a referendum by at least a two-thirds majority of the growers voting. Quotas are, of course, either approved or disapproved on a national basis covering all areas of production.

The national marketing quota is expressed in the usual unit of measurement (pounds or bushels), but to facilitate apportionment to States it is translated into acres on the basis of recent yields. These "acres" are allotted to individual farms on the basis of a number of factors including amount of cropland, and production history.

In 1952 Burley, flue-cured, and Virginia sun-cured tobacco farmers produced the third crop under three-year quotas, approved in separate referenda, for the years 1950, 1951, and 1952. The 1952 fire-cured crop was the first to be produced under renewed three-year quotas approved on December 7, 1951 for the 1952, 1953, and 1954 crops.

## Marketing Quota Programs - Continued

National results of four referenda held in 1952 on tobacco are as follows:

Kind	Date of Referendum	Crop Year Covered	Total Votes Cast	Percentage of Votes		
				For 3 yrs:	For 1 yr:	Against
Burley	11/22/52	1953-54-55	179,493	97.0	1.3	1.7
Flue-cured	7/12/52	1953-54-55	260,163	97.8	1.0	1.2
Va.Sun-cured	11/22/52	1953-54-55	2,095	97.1	2.0	0.9
Maryland	10/29/52	1953-54-55	6,383	64.5	9.6	25.9

Only on Maryland Type-32 tobacco were quotas not approved by the two-thirds majority necessary for quotas to be operative. Virginia growers voted in favor of three-year quotas on Burley and flue-cured by overwhelming majorities comparable to the national figures, as well as on Virginia sun-cured produced only in Virginia.

Not only do quotas limit production to the quantity which the market can absorb in an orderly manner, but they assure a fair price to the grower. When quotas are in effect, growers who plant within their acreage allotments and otherwise abide by quota regulations, are assured of price support at a level defined by law, which in the case of all kinds of tobacco is 90 per cent of parity and for peanuts 90 per cent of parity (through the year 1954).

Tobacco prices are supported to individual farmers who harvest within their acreage allotments by non-recourse loans made to the farmers producing the tobacco. Loans are made during the regular marketing seasons through growers' cooperative associations under contract with Commodity Credit Corporation. The grower is assured of a price equal to the loan rate since he may negotiate a non-recourse loan on any particular lot of tobacco for which the auction price on the warehouse floor is not above the loan level for the particular grade. Tobacco placed under loan is later sold by the cooperative association, and any profits above all costs, such as re-drying, packing, and storing, are prorated to the original growers.

The following summarization shows by kinds of tobacco for the 1952 crop (1) producer's total sales, (2) value, (3) average price per pound, (4) loan rate, and (5) per cent taken under loan.

# Marketing Quota Programs - Continued

Type of Tobacco	Total Sales (Million Lbs.)	Value	Average Price	Loan Rate	Per Cent Placed Under Loan
Burley (Type 31)	650.0	326,970,175	50.3	49.5	15.9
Flue-cured (Types 11-14)	1357.6	685,220,906	50.5	50.6	12.2
Va. Fire-cured (Type 21)	12.2	4,312,089	35.5	37.1	19.9
Va. Sun-cured (Type 37)	3.7	1,172,255	31.6	33.0	2.3

The price of the 1952 crop of peanuts was supported to growers who harvested within their acreage allotments through farm-stored loans and Growers Peanut Cooperative "advance" loans.

The foregoing is not intended to cover price support operations on tobacco and peanuts, but to point out the close relationship between the allotment and support programs. Obviously, growers should be assured of a fair price for crops produced under acreage restrictions, while at the same time it would be most unwise to attempt to support prices on crops in overabundant supply without some control on the amount of production. To accomplish this objective of controlling production to required amounts and assuring growers of a fair price for the commodities produced, allotments and price supports go hand in hand.

Marketing quota penalties on the 1952 crop in the amounts of \$249,305.47 for tobacco and \$50,649.53 for peanuts have been collected from those producers who chose to produce in excess of their farm allotments thereby becoming ineligible for price support on the crop for which the allotment was exceeded and liable for penalty.

### SECTION III - 1952 PRICE SUPPORT PROGRAMS

ASC county committees administered the commodity price support programs of the Commodity Credit Corporation on the county level. Such supports were offered eligible farmers through warehouse-stored loans, farm-stored loans and purchase agreement, and Growers' Peanut Cooperative "Advance loans." In comparison with previous years the loan program was one of the most extensive ever in this State, and resulted in take-over by CCC of most of the wheat placed under loan. Other commodities under loan were largely redeemed by farmers prior to maturity, as a result of increases in market prices which made such redemptions feasible.

Most of the credit for the successful operation of the programs can, of course, be given to the county committeemen and county office personnel. The many details of processing the various documents were handled in addition to the usual workload of other programs. Often extra hours were spent to provide the best possible service to farmers. "Loan inspectors," in counties with farm-stored loans routinely advised with farmers as to methods of safely storing their commodities. Much credit is also due the warehousemen, operating under Uniform Grain Storage Agreements with CCC, for the fine cooperation and many extra services made available to farmers in storing this grain. The men of the Federal-State Inspection of the Virginia Department of Agriculture gave unstintingly of their time and efforts in order to provide grading services wherever needed.

The peanut support program in 1952 was for the first time put on a basis similar to methods of support for other commodities. Prior to this peanuts were supported through Sheller Contracts, whereby farmers received sales prices equal to supports. In 1951 farm-stored loans were offered for the first time. The program in 1952 provided for farm-stored loans, Purchase Agreements, and "advance" loans through Growers' Peanut Cooperative.

CCC loans were made on 184 bales of 1952-crop cotton in Virginia. Market prices for cotton during most of the season ranged from about in line to slightly below the loan rate of 32.84 cents per pound (for 15/16-inch Middling) and there was considerably more interest in the loan program than in 1951.

Price supports on 1952-crop cottonseed were also available. There were no loans or purchase agreements on cottonseed in this State, and supports were provided through a purchase program involving participating ginners and oil millers. Participating ginners were committed under this program to pay not less than \$62.40 per ton for eligible cottonseed, basis grade 100. Participating oil millers were obligated to purchase eligible cottonseed from participating ginners at not less than \$66.40 per ton, basis grade 100. Most of the ginners in Virginia participated in this program.
